1   Introduction

This document contains some of the errors I faced during the course of working on my assignments and research. They had simple solutions (most of them), however finding the solution took hours. I will be updating this document frequently and I hope other students do not waste time on the same errors.

1. statustitle This error occured while compiling "$ProjectWork\_YYYYMMDD.tex$". In "UN5390.sty" we have stitle at line 324 while in "$ProjectWork\_YYYYMMDD.tex$" we have statustitle. Replace statustitle with stitle and compile.
